# A. Next Round

time limit per test: 3 seconds
memory limit per test: 256 megabytes
input: standard input
output: standard output

"Contestant who earns a score equal to or greater than the $k$-th place finisher's score will advance to the next round, as long as the contestant earns a positive score..." — an excerpt from contest rules.

A total of $n$ participants took part in the contest ($n \geq k$), and you already know their scores. Calculate how many participants will advance to the next round.

## Input

The first line of the input contains two integers $n$ and $k$ ($1 \leq k \leq n \leq 50$) separated by a single space.

The second line contains $n$ space-separated integers $a_1, a_2, \ldots, a_n$ ($0 \leq a_i \leq 100$), where $a_i$ is the score earned by the participant who got the $i$-th place. The given sequence is non-increasing (that is, for all $i$ from $1$ to $n$ - $1$ the following condition is fulfilled: $a_i \geq a_{i+1}$).

## Output

Output the number of participants who advance to the next round.

## Examples

| input |
| --- |
| 8 5<br>10 9 8 7 7 7 5 5 |
| **output** |
| 6 |

| input |
| --- |
| 4 2<br>0 0 0 0 |
| **output** |
| 0 |

## Note

In the first example the participant on the 5th place earned 7 points. As the participant on the 6th place also earned 7 points, there are 6 advancers.

In the second example nobody got a positive score.

**→ Attention**

Package for this problem was not updated by the problem writer or Codeforces administration after we've upgraded the judging servers. To adjust the time limit constraint, solution execution time will be multiplied by 2. For example, if your solution works for 400 ms on judging servers, then value 800 ms will be displayed and used to determine the verdict.

Practice

**→ Virtual participation**

Virtual contest is a way to take part in past contest, as close as possible to participation on time. It is supported only ACM-ICPC mode for virtual contests. If you've seen these problems, a virtual contest is not for you - solve these problems in the archive. If you just want to solve some problem from a contest, a virtual contest is not for you - solve this problem in the archive. Never use someone else's code, read the tutorials or communicate with other person during a virtual contest.

You can clone this contest to a mashup.

Clone Contest

**→ Submit?**

Language: GNU GCC C11 5.1.0

Choose file: Choose File No file chosen

Be careful: there is 50 points penalty for submission which fails the pretests or resubmission (except failure on the first test, denial of judgement or similar verdicts). "Passed pretests" submission verdict doesn't guarantee that the solution is absolutely correct and it will pass system tests.

Submit

**→ Last submissions**

| Submission | Time | Verdict |
| --- | --- | --- |
| 51722735 | Mar/22/2019 20:45 | Accepted |
| 51722417 | Mar/22/2019 20:39 | Wrong answer on test 7 |
